for the Android version of the application
“Bitcoin & Crypto Price Widget”

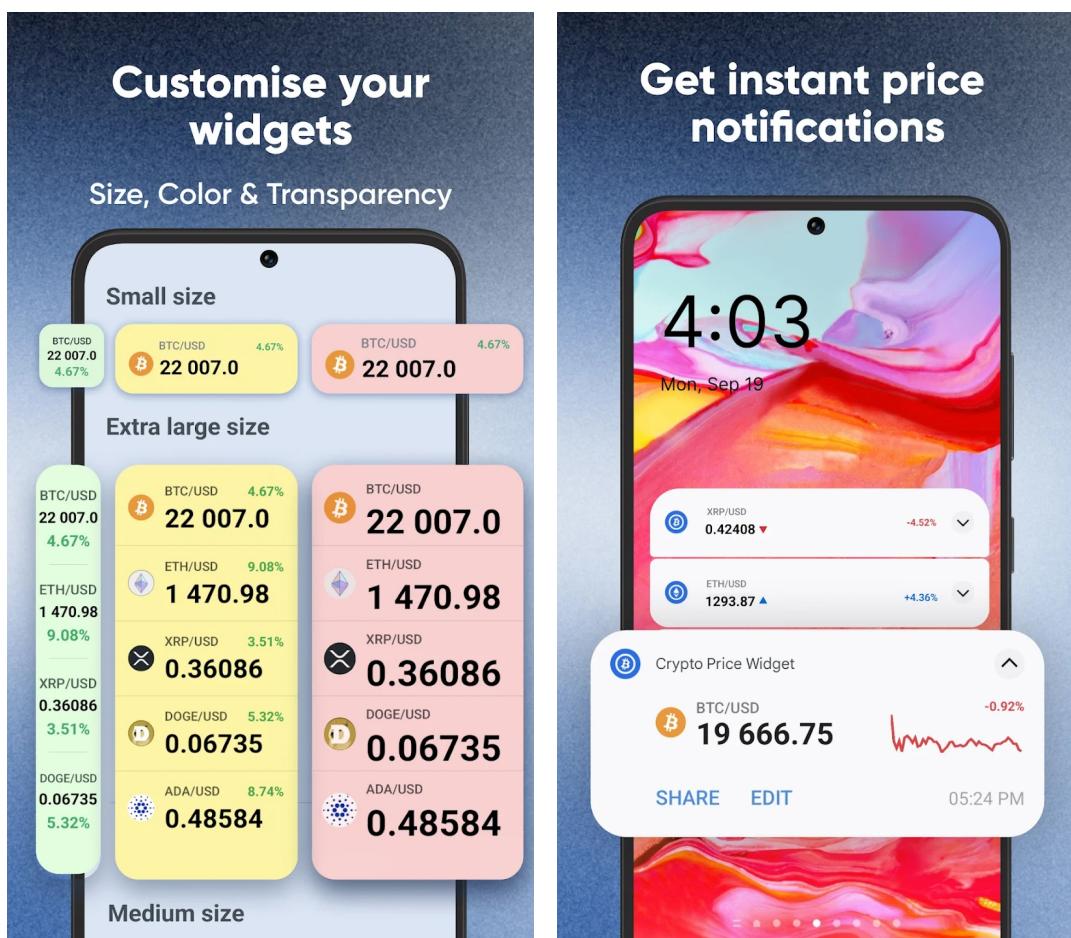

version 1.51 (Feb 24, 2023)

About the Application

Bitcoin & Crypto Price Widget, a new app designed to help traders and investors stay up to date with the latest price movements in the world's major cryptocurrencies right from their home screens.

Bitcoin & Crypto Price Widget is a powerful and dynamic tool that provides actual market information, chosen by the user, from a total of 392 of cryptocurrencies traded across the globe, such as Bitcoin, Ethereum, Ripple, Shiba and more.

The Bitcoin Price Widget allows users to track currencies before investing in them. It also allows them to adjust backgrounds and transparency according to their preferences.
